

Love  Our

Earth 

EARTH DAY

FRESH AIR @ HOME

Materials:

- Scissors
 - Glue
 - Markers
 - Pencil
 - Colored paper, magazines or newspapers that are ready to be recycled
- (You can even get really creative and use food wrappers - just make sure they're clean first!)

Instructions:

- 1) Start with a base paper for your collage.
- 2) Cut or tear strips of your colored paper, or magazines and newspapers. Make them different sizes and shapes - it's up to you! (If you have any blue pieces they are great for oceans, and green pieces are great for land.)
- 3) Draw a circle for the Earth in the middle of your paper and use your pencil to draw continents - it doesn't have to be perfect!
- 4) Next, get started on collaging. Start with your water pieces - line them up around the countries and glue each piece down.
- 5) Continue to add your water pieces to complete your oceans. Then, glue your land pieces onto your continents!
- 6) The last step, customize it! Using your markers or crayons decorate around your Earth!
